## OBJECTIVE

3rd-year Information Systems student at University of Information Technology – VNU-HCM (UIT) with a passion for web development and crafting engaging user interfaces. Aspiring to become a Software Engineer with a focus on Frontend Development. Adept at problem-solving, responsive design, and translating complex data into intuitive interactive dashboards. Seeking the **Product Frontend Intern** position at Geek Internship Autumn 2026 to leverage my analytical skills, learn modern frontend technologies, and contribute to real-world product development in a collaborative team environment. Available full-time from 17/08/2026 to 23/10/2026.

## EDUCATION

University of Information Technology – VNU-HCM (UIT) 2023 – 2027 (expected)  
**Bachelor of Information Systems** GPA: 8.06/10  
*Relevant Coursework: Web Development, Information Systems Analysis & Design, Database Management Systems, Data Mining*

## SKILLS

|             |                                                                                  |
|-------------|----------------------------------------------------------------------------------|
| Frontend    | JavaScript (ES6+), HTML5, CSS3, Responsive Design, DOM Manipulation, RESTful API |
| Programming | Python, PHP, Java, C++, SQL                                                      |
| Tools       | Figma, Git/GitHub                                                                |
| Languages   | IELTS 6.5 (2022)                                                                 |

## PROJECTS

**NYC Taxi — Real-time Fleet Intelligence Web Dashboard** 2026  
*Streamlit, Python, PySpark, PostgreSQL, Kafka* | [GitHub](#)

- Web Dashboard Development:** Designed and developed an interactive web dashboard using Streamlit to visualize real-time fleet operations, focusing on a clean layout and seamless user experience.
- Dynamic Data Integration:** Connected the frontend interface with streaming data (Kafka/PostgreSQL) to dynamically update maps and statistical charts without page reloads, ensuring high responsiveness.
- UI/UX & Interactive Controls:** Prioritized user-centric design by implementing intuitive filtering controls, interactive widgets, and visual alerts for system managers to monitor anomalies efficiently.
- Performance & Testing:** Conducted continuous testing of UI components to ensure application stability, optimal rendering speed, and cross-platform compatibility.

**E-commerce Consumer Behaviour Interactive Dashboard** 2025  
*Power BI, SQL Server, Python, SSIS, SSAS* | [GitHub](#)

- UI Design & Data Visualization:** Translated complex customer segmentation datasets into engaging, easy-to-understand visual interfaces and dashboards.
- Requirement Analysis & Prototyping:** Collaborated with stakeholders to understand business goals, wireframing dashboard layouts that directly addressed user needs and workflows.
- Rendering Optimization:** Optimized underlying data queries to ensure the visual dashboard loaded quickly and smoothly when rendering over 100,000 transaction records.
- User Documentation:** Maintained clear documentation for the dashboard’s interactive features, facilitating easy adoption for non-technical end-users.
