OBJECTIVE

Proactive 3rd-year Information Systems student at University of Information Technology – VNU-HCM (UIT) with a passion for web development and crafting engaging user interfaces. Aspiring to become a Software Engineer with a focus on Frontend Development. Adept at problem-solving, responsive design, and translating complex data into intuitive interactive dashboards. Seeking the **Product Frontend Intern** position at Geek Internship Autumn 2026 to leverage my analytical skills, learn modern frontend technologies, and contribute to real-world product development in a collaborative team environment. Available full-time from 17/08/2026 to 23/10/2026.

EDUCATION

University of Information Technology – VNU-HCM (UIT) 2023 – 2027 (expected)
Bachelor of Information Systems GPA: 8.06/10
Relevant Coursework: Web Development, Information Systems Analysis & Design, Database Management Systems, Data Mining

SKILLS

Frontend & Web Dev	JavaScript, HTML5, CSS3, Responsive Web Design, UI/UX Implementation, DOM Manipulation
UI/UX & Tools	Figma, Streamlit, Git, GitHub, Docker, draw.io, UML
Programming	Python, Java, C++, SQL, RESTful API Concepts
Data Visualization	Power BI, Plotly, Seaborn, Matplotlib, Interactive Dashboards
Core Competencies	Problem Solving, Agile/Scrum Methodology, Cross-Functional Collaboration, Testing & Debugging
Languages & Others	IELTS 6.5 (2022), Proactive Learning, Analytical Thinking

PROJECTS

NYC Taxi — Real-time Fleet Intelligence Web Dashboard 2026
Streamlit, Python, PySpark, PostgreSQL, Kafka | [GitHub](#)

- **Frontend UI Implementation:** Designed and developed an interactive Streamlit web dashboard to visualize real-time fleet operations and anomaly detection results, focusing on a clean layout and seamless user experience.
- **Data Integration & Responsiveness:** Connected the frontend interface with PostgreSQL and streaming data to dynamically update maps and statistical charts without page reloads, ensuring high responsiveness.
- **User-Centric Design:** Prioritized UI/UX by providing intuitive filtering controls and visual alerts for system managers to monitor anomalies and track performance efficiently.
- **Testing & Debugging:** Conducted continuous testing of the UI components and data pipelines to ensure stability, optimal rendering speed, and cross-platform compatibility of the dashboard.

E-commerce Consumer Behaviour Interactive Dashboard 2025
Power BI, SQL Server, Python, SSIS, SSAS | [GitHub](#)

- **UI Design & Visualization:** Translated complex customer segmentation and predictive ML outputs into engaging, easy-to-understand visual interfaces using Power BI.
- **Requirement Analysis:** Collaborated with stakeholders to understand business goals and mapped data flows to design intuitive dashboard layouts that directly addressed user needs.
- **Performance Optimization:** Optimized data queries, indexing, and rendering processes to ensure the dashboard loaded quickly and smoothly when handling over 100,000 transaction records.
- **Documentation & Collaboration:** Maintained clear documentation for the dashboard's interactive features and metrics, facilitating easy adoption and effective communication with non-technical team members.

Bank Customer Churn Analysis & Explainability 2026
Python, Scikit-learn, Pandas, SHAP, LIME | [GitHub](#)

- **Data Presentation:** Developed clear visualizations and explainability reports (using SHAP and LIME) to interpret complex AI/ML outputs, effectively translating them into understandable visual drivers for business users.
- **Analytical Problem Solving:** Applied strong analytical skills to meticulously clean, normalize, and extract actionable features from a 10,000-record dataset, demonstrating a keen eye for detail.
- **Team Collaboration:** Worked closely in a collaborative environment to research algorithms, maintaining a clean, version-controlled codebase using Git/GitHub for seamless team integration.
